

Bandit Labs Assignment: Levels 11-20

Objective

This assignment will test your understanding and practical application of basic Linux commands and security concepts. You will be working through Bandit levels 11 through 20. For each level, you are required to solve the challenge, document the commands you used, and provide a screenshot of the successful outcome.

Instructions

1. **Access the Bandit wargame:** Connect to the Bandit wargame server using an SSH client. The address is `bandit.labs.overthewire.org` on port 2220.
2. **Solve the Levels:** Work through each level from 11 to 20 sequentially. You'll use the password from the previous level to log in to the next.
3. **Document Your Work:** For each level, write down the commands you used to find the password.
4. **Capture Screenshots:** Take a screenshot of the terminal after you successfully find the password for each level. The screenshot should show the command you used and the output that contains the password.
5. **Compile the Assignment:** After completing all the levels, compile your documentation and screenshots into a single document. Organize it by level number.
